

Muhammad Haroon

theharoonaly@gmail.com

Results-driven AI-First Software Engineer with experience in full-stack development, scalable web applications, and modern software architecture. Skilled in building production-ready apps, optimizing system performance, and collaborating across teams to deliver high-quality products. Currently pursuing a master's degree in information & communications engineering in Germany and seeking Software Engineer opportunity to apply my industry.

EDUCATION

Berliner Hochschule Für Technik, Berlin, Germany
Master of Information & Communications Engineering

2026 - Present

The Islamia University of Bahawalpur, Bahawalpur, Pakistan
Bachelor of Computer Systems Engineering | CGPA – 3.50 / 4.00

2019 - 2023

WORK EXPERIENCE

Software Engineer – [Concision.AI](#), Germany

June 2025 – Present

- Contributing as a Full Stack Developer on the Concision platform.
- Collaborating with an international team to develop solutions involving AI Spreadsheets, Prompt Chain Engineering, and Custom Retrieval-Augmented Generation (RAG) pipelines.
- Creating scalable microservices and production-ready software to efficiently manage user load and ensure system reliability.

Contact Person: lars.niklas.weber@gmail.com

Software Engineer – [GIS System](#), Germany

Nov 2025 – June 2026

- Working as a full stack developer specializing in mobile apps using react-native and express.
- Collaborating with German clients, implementing a large-scale employee management system for school.
- Stay current with emerging technologies to continuously explore innovative solutions and enhance user experience.

Contact Person: info@gissystem.eu

Senior Software Engineer – [Devaxl](#), Islamabad

Jan 2024 – July 2025

- Worked as a Full-Stack developer and collaborate with cross-functional teams to meet the requirements into functional software applications.
- Design and implement software architectures that optimize system performance, reliability, and maintainability.
- Spearhead the adoption of industry best practices, code reviews, and agile methodologies to enhance development efficiency.
- Identify and resolve complex technical issues while maintaining seamless user experience and operational workflows.
- Provide mentorship and guidance to junior developers, fostering a culture of learning and continuous improvement.

Contact Person: touqeer@devaxl.com

Freelance Full Stack Developer | [TOP RATED](#) – Upwork ([CLICK HERE](#))

Since 2023

- Developed and delivered custom software solutions for diverse clients, focusing on scalable web applications, responsive design, and seamless user experiences.
- Provided end-to-end UI/UX design services, ensuring modern, visually appealing, and accessible interfaces tailored to client requirements.
- Designed and developed robust back-end systems, optimizing performance, security, and data management.

PROJECTS

💡 **Apollo** is a transportation management company based in Florida, where we worked closely to create a comprehensive tech solution for fleet operations, route optimization, and document automation. We designed and implemented AI-driven features to improve operational efficiency, including real-time tracking, automated reporting, and security enhancements

Latimer.AI Developed a specialized AI-powered chatbot system focused on African history. Designed and integrated a knowledge retrieval framework, leveraging custom AI models to enhance user engagement. Led the full-stack development efforts, ensuring a responsive and efficient system for historical research and learning

ANinja: Contributed to the development of a customer relationship management (CRM) platform tailored for small businesses. Designed automation workflows, integrating messaging, email, and chatbot functionalities to enhance lead management. Optimized the back-end infrastructure to support high data throughput and seamless user interactions.

Etesal Health: Contributed to the development of a pharmacy appointment and job search platform, streamlining the connection between healthcare professionals and patients. Worked on enhancing data security, implementing real-time updates, and improving user accessibility.

SKILLS

Skills: React.js, React Native, Next.js, Laravel, Node.js, LangChain, LangGraph, Nest.js, Express.js, Supabase, Firebase, MySQL, MongoDB, AI Automation, AWS, Heroku, Python, Data Modeling, Data Cleaning, PowerBI.

Programming Languages: Java, JavaScript, Python, PHP
